MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 63 (1992)

[^{3}H]acetylcholine release, neurotensin, development, cat terminal ileum, contraction, 147
Adenylate cyclase, beta-adrenergic receptors, fibroblast, aging, division, cellular senescence, 247
β-Adrenergic drugs, ageing, blood pressure, epinephrine, heart rate, isoproterenol, phenylephrine, 91
Age-related pigmented changes, TV-image analysis, neurocytes, neuromelanin, 215
Ageing of skeletal muscle, atrophy of muscle, exercise, muscle fiber area, muscle fiber type, 69
Ageing, β-adrenergic drugs, blood pressure, epinephrine, heart rate, isoproterenol, phenylephrine, 91
Ageing, artrial natriuretic peptide, heart, conscious rat, 177
Ageing, *Caenorhabditis elegans*, Gompertz equation, lifespan determinant, lifespan shortening, nematode, oxygen, 235
Ageing, D-glucose transport, kinetic parameters, brush border membrane vesicles, rat jejunum, 131
Ageing, leucine uptake, brush-border membrane vesicles, rat jejunum, 257
Ageing, lymphoblasts, calcium, Alzheimer's disease, 1
Aging, alcohol, sympathetic neurons, catecholamines, tyrosine hydroxylase, lipopigment, 193
Aging, beta-adrenergic receptors, fibroblast, adenylate cyclase, division, cellular senescence, 247
Aging, cervical cancer, mortality, epidemiology, 117
Aging, DNA excision repair, caloric restriction, rat fibroblasts, 165
Aging, dopamine, dopaminergic neurons, striatum, limbic forebrain, medio basal hypothalamus, anterior pituitary, 45
Aging, exercise, drug metabolism, 275
Aging, food restriction, immune functions, IL-2 receptors, lipid composition, insulin binding, 27
Aging, oxy-radicals, free radicals, catalase, antioxidants, life span, oxidative stress, 287
Aging, T cells, naive T cells, memory T cells, human, 57
Aging, Werner's syndrome, insulin resistance, glucose clamp, 11
Alcohol, aging, sympathetic neurons, catecholamines, tyrosine hydroxylase, lipopigment, 193
Alzheimer's diease, B lymphocytes, Epstein-Barr virus immortalisation, lymphoblastoid cell lines, Ig secretion, 105
Alzheimer's disease, lymphoblasts, calcium, ageing, 1
Anterior pituitary, dopamine, dopaminergic neurons, aging, striatum, limbic forebrain, medio basal hypothalamus, 45
Antioxidants, aging, oxy-radicals, free radicals, catalase, life span, oxidative stress, 287
Artrial natriuretic peptide, ageing, heart, conscious rat, 177
Atrophy of muscle, ageing of skeletal muscle, exercise, muscle fiber area, muscle fiber type, 69

B lymphocytes, Alzheimer's diease, Epstein-Barr virus immortalisation, lymphoblastoid cell lines, Ig secretion, 105
Beta-adrenergic receptors, fibroblast, aging, adenylate cyclase, division, cellular senescence, 247
Blood pressure, ageing, β-adrenergic drugs, epinephrine, heart rate, isoproterenol, phenylephrine, 91
Brush border membrane vesicles, ageing, D-glucose transport, kinetic parameters, rat jejunum, 131
Brush-border membrane vesicles, ageing, leucine uptake, rat jejunum, 257

Caenorhabditis elegans, ageing, Gompertz equation, lifespan determinant, lifespan shortening, nematode, oxygen, 235
Calcium, lymphoblasts, Alzheimer's disease, ageing, 1

Caloric restriction, DNA excision repair, aging, rat fibroblasts, 165
Calorie-restricted diet, life prolongation, mitochondria respiration and oxidative phosphorylation, thermogenesis, 79
Cat terminal ileum, neurotensin, development, contraction, [^{3}H]acetylcholine release, 147
Catalase, aging, oxy-radicals, free radicals, antioxidants, life span, oxidative stress, 287
Catecholamines, aging, alcohol, sympathetic neurons, tyrosine hydroxylase, lipopigment, 193
Cell migration, human fetal lung fibroblasts, human skin fibroblasts, in vitro aging, donor age, 223
Cellular senescence, beta-adrenergic receptors, fibroblast, aging, adenylate cyclase, division, 247
Cervical cancer, mortality, aging, epidemiology, 117
Concanavalin A, elderly, T cells, recombinant interleukin-2, precursors, 297
Conscious rat, ageing, artrial natriuretic peptide, heart, 177
Contraction, neurotensin, development, cat terminal ileum, [^{3}H]acetylcholine release, 147

D-glucose transport, ageing, kinetic parameters, brush border membrane vesicles, rat jejunum, 131
(−)Deprenyl, (−)parafluorodeprenyl, neurocytes in substantia nigra, neuromelanin, prevention of age-related pigment changes, 157
Development, neurotensin, cat terminal ileum, contraction, [^{3}H]acetylcholine release, 147
Division, beta-adrenergic receptors, fibroblast, aging, adenylate cyclase, cellular senescence, 247
DNA excision repair, aging, caloric restriction, rat fibroblasts, 165
Donor age, cell migration, human fetal lung fibroblasts, human skin fibroblasts, in vitro aging, 223
Dopamine, dopaminergic neurons, aging, striatum, limbic forebrain, medio basal hypothalamus, anterior pituitary, 45
Dopaminergic neurons, dopamine, aging, striatum, limbic forebrain, medio basal hypothalamus, anterior pituitary, 45
Drug metabolism, exercise, aging, 275
Dysdifferentiation, mammalian aging, immune aging, T cells, thymus, 207

Elderly, T cells, concanavalin A, recombinant interleukin-2, precursors, 297
Epidemiology, cervical cancer, mortality, aging, 117
Epinephrine, ageing, β-adrenergic drugs, blood pressure, heart rate, isoproterenol, phenylephrine, 91
Epstein-Barr virus immortalisation, Alzheimer's diease, B lymphocytes, lymphoblastoid cell lines, Ig secretion, 105
Exercise, ageing of skeletal muscle, atrophy of muscle, muscle fiber area, muscle fiber type, 69
Exercise, aging, drug metabolism, 275
Fibroblast, beta-adrenergic receptors, aging, adenylate cyclase, division, cellular senescence, 247

Food restriction, aging, immune functions, IL-2 receptors, lipid composition, insulin binding, 27
Free radicals, aging, oxy-radicals, catalase, antioxidants, life span, oxidative stress, 287

Glucose clamp, Werner's syndrome, insulin resistance, aging, 11
Gompertz equation, ageing, *Caenorhabditis elegans*, lifespan determinant, lifespan shortening, nematode, oxygen, 235

Heart rate, ageing, β-adrenergic drugs, blood pressure, epinephrine, isoproterenol, phenylephrine, 91
Heart, ageing, artrial natriuretic peptide, conscious rat, 177
Human fetal lung fibroblasts, cell migration, human skin fibroblasts, in vitro aging, donor age, 223
Human skin fibroblasts, cell migration, human fetal lung fibroblasts, in vitro aging, donor age, 223
Human, T cells, naive T cells, memory T cells, aging, 57

Ig secretion, Alzheimer's diease, B lymphocytes, Epstein-Barr virus immortalisation, lymphoblastoid cell lines, 105
IL-2 receptors, aging, food restriction, immune functions, lipid composition, insulin binding, 27
Immune aging, mammalian aging, dysdifferentiation, T cells, thymus, 207
Immune functions, aging, food restriction, IL-2 receptors, lipid composition, insulin binding, 27
In vitro aging, cell migration, human fetal lung fibroblasts, human skin fibroblasts, donor age, 223

Insulin binding, aging, food restriction, immune functions, IL-2 receptors, lipid composition, 27
Insulin resistance, Werner's syndrome, glucose clamp, aging, 11
Isoproterenol, ageing, β-adrenergic drugs, blood pressure, epinephrine, heart rate, phenylephrine, 91

Kinetic parameters, ageing, D-glucose transport, brush border membrane vesicles, rat jejunum, 131

Leucine uptake, ageing, brush-border membrane vesicles, rat jejunum, 257
Life prolongation, calorie-restricted diet, mitochondria, respiration and oxidative phosphorylation, thermogenesis, 79
Life span, aging, oxy-radicals, free radicals, catalase, antioxidants, oxidative stress, 287
Lifespan determinant, ageing, *Caenorhabditis elegans*, Gompertz equation, lifespan shortening, nematode, oxygen, 235
Lifespan shortening, ageing, *Caenorhabditis elegans*, Gompertz equation, lifespan determinant, nematode, oxygen, 235
Limbic forebrain, dopamine, dopaminergic neurons, aging, striatum, medio basal hypothalamus, anterior pituitary, 45
Lipid composition, aging, food restriction, immune functions, IL-2 receptors, insulin binding, 27
Lipopigment, aging, alcohol, sympathetic neurons, catecholamines, tyrosine hydroxylase, 193
Lymphoblastoid cell lines, Alzheimer's diease, B lymphocytes, Epstein-Barr virus immortalisation, Ig secretion, 105
Lymphoblasts, calcium, Alzheimer's disease, ageing, 1

Mammalian aging, immune aging, dysdifferentiation, T cells, thymus, 207
Medio basal hypothalamus, dopamine, dopaminergic neurons, aging, striatum, limbic forebrain, anterior pituitary, 45
Memory T cells, T cells, naive T cells, aging, human, 57
Microvascular aging, microvascular histochemistry, periodic acid-Schiff reaction and aging, vertebrate microvasculature and aging, vertebrate aging, 183
Microvascular histochemistry, microvascular aging, periodic acid-Schiff reaction and aging, vertebrate microvasculature and aging, vertebrate aging, 183
Mitochondria, life prolongation, calorie-restricted diet, respiration and oxidative phosphorylation, thermogenesis, 79
Mortality, cervical cancer, aging, epidemiology, 117
Muscle fiber area, ageing of skeletal muscle, atrophy of muscle, exercise, muscle fiber type, 69
Muscle fiber type, ageing of skeletal muscle, atrophy of muscle, exercise, muscle fiber area, 69

Naive T cells, T cells, memory T cells, aging, human, 57
Nematode, ageing, *Caenorhabditis elegans*, Gompertz equation, lifespan determinant, lifespan shortening, oxygen, 235
Neurocytes in substantia nigra, (−)deprenyl, (−)parafluorodeprenyl, neuromelanin, prevention of age-related pigment changes, 157
Neurocytes, TV-image analysis, age-related pigmented changes, neuromelanin, 215
Neuromelanin, (−)deprenyl, (−)parafluorodeprenyl, neurocytes in substantia nigra, prevention of age-related pigment changes, 157
Neuromelanin, TV-image analysis, age-related pigmented changes, neurocytes, 215
Neurotensin, development, cat terminal ileum, contraction, [^{3}H]acetylcholine release, 147

Oxidative stress, aging, oxy-radicals, free radicals, catalase, antioxidants, life span, 287
Oxy-radicals, aging, free radicals, catalase, antioxidants, life span, oxidative stress, 287
Oxygen, ageing, *Caenorhabditis elegans*, Gompertz equation, lifespan determinant, lifespan shortening, nematode, 235

(−)Parafluorodeprenyl, (−)deprenyl, neurocytes in substantia nigra, neuromelanin, prevention of age-related pigment changes, 157
Periodic acid-Schiff reaction and aging, microvascular aging, microvascular histochemistry, vertebrate microvasculature and aging, vertebrate aging, 183
Phenylephrine, ageing, β-adrenergic drugs, blood pressure, epinephrine, heart rate, isoproterenol, 91
Precursors, elderly, T cells, concanavalin A, recombinant interleukin-2, 297
Prevention of age-related pigment changes, (−)deprenyl, (−)parafluorodeprenyl, neurocytes in substantia nigra, neuromelanin, 157

Rat fibroblasts, DNA excision repair, aging, caloric restriction, 165
Rat jejunum, ageing, D-glucose transport, kinetic parameters, brush border membrane vesicles, 131
Rat jejunum, ageing, leucine uptake, brush-border membrane vesicles, 257
Recombinant interleukin-2, elderly, T cells, concanavalin A, precursors, 297
Respiration and oxidative phosphorylation, life prolongation, calorie-restricted diet, mitochondria, thermogenesis, 79

Striatum, dopamine, dopaminergic neurons, aging, limbic forebrain, medio basal hypothalamus, anterior pituitary, 45
Sympathetic neurons, aging, alcohol, catecholamines, tyrosine hydroxylase, lipopigment, 193

T cells, elderly, concanavalin A, recombinant interleukin-2, precursors, 297
T cells, mammalian aging, immune aging, dysdifferentiation, thymus, 207
T cells, naive T cells, memory T cells, aging, human, 57
Thermogenesis, life prolongation, calorie-restricted diet, mitochondria, respiration and oxidative phosphorylation, 79
Thymus, mammalian aging, immune aging, dysdifferentiation, T cells, 207
TV-image analysis, age-related pigmented changes, neurocytes, neuromelanin, 215
Tyrosine hydroxylase, aging, alcohol, sympathetic neurons, catecholamines, lipopigment, 193

Vertebrate aging, microvascular aging, microvascular histochemistry, periodic acid-Schiff reaction and aging, vertebrate microvasculature and aging, 183
Vertebrate microvasculature and aging, microvascular aging, microvascular histochemistry, periodic acid-Schiff reaction and aging, vertebrate aging, 183

Werner's syndrome, insulin resistance, glucose clamp, aging, 11
